

Technical rider Anamesa 2024

Thank you for taking the time to read our rider! We have an acoustic sound, and the mix can stay close to that sound. In small rooms, just a little extra amplification is needed, to make it what we call 'acoustic plus'. Jan-Roelof and Leonieke alternate singing the lead, and also sing a lot of harmony. Jelte sings backing vocals. The left hand of the accordion is the bass side, and can sound nice and full on the low. A little bit of reverb on everything is nice.

We have our own instrument mics, and two vocal mics as well. We have some stands too, but if you already have them set up, we are happy to leave them in the van, to avoid mixing things up!

This is our setup from left to right, seen from the room

Jan-Roelof

accordion

has his own clip-on mics, 2x XLR

voice

mic + stand

Jelte

string and percussion

has his own mic, needs a low stand, 1x XLR

voice (backing)

mic + stand (if there is a shortage inputs, we can do without this one)

Leonieke

voice and flute

mic + stand

clarinet

has her own clip-on mic, 1x XLR

acoustic guitar

has a small amp, guitar can go over that, otherwise: 1x DI 5mm jack
